To: packet-radio@ucsd.edu

Just like model 100 with built-in basic, note, sched, word, and Telcom  
(communication via RS232 or built-in modem). It's in mint working condition.  
If you are a HAM, it's perfect for packet on the go.

Price is \$100 + shipping/COD.  
I can be reached via Email or packet mail KQ40Y@n4awx.#cocoa.fl.usa.na  
Please leave a msg (or a number I can reply sooner).

TNX  
Tom

Subject: 9600 b/s full-duplex repeater question  
To: packet-radio@ucsd.edu

I am looking into building a 9600 b/s full-duplex repeater for use on our LAN and have a few questions. The idea is to use the TAPR 9600 b/s modem board, a TX and RX, but without a TNC or other equipment. (The TAPR board has a bit regenerator option.)

Has anybody done this already?

What about repeater control and ID? (Is this even legal as described?)

What about connecting a P10 or DataEngine to it at a later date to provide inter-LAN connectivity?

Thanks in advance,  
Jeff Austen, k9ja, Cookeville TN, Internet: jra1854@tntech.edu

Hi Ian,  
I'm running win 3.1 on a 1MEG 286 using Baycom 1.5a. I have no probs at all other than my system is kind of slow due to being 286/1MB. I have had it running on a 4MB 486 with no prob either. I did not use any PIF files. Only ran it directly using Icon which points directly at the executable (ie from file manager drag the Baycom.bat file to desktop folder).

Other info which may help: baycom modem is on com1, mouse is on com2, phone modem is on com3.

Good luck,  
Tom - KQ40Y @n4awx.#cocoa.fl.usa.na

PS I have had both the Baycom and phone modem running and connected to different PBBS and BBS on the 486 system.

Subject: Poor Mans Packet ?  
To: packet-radio@ucsd.edu

Hi folks!

I'm new to packet radio and I'd like to know what I need to  
build a TNC (poor mans packet?) and what software is available.

If there is stuff for UNIX too that would be great!
